LUMINANT HOPEWELL POWER PLANT ACHIEVES ITS FIRST VIRGINIA STAR DESIGNATION UNDER THE VIRGINIA DEPARTMENT OF LABOR AND INDUSTRY'S VOLUNTARY PROTECTION PROGRAMS

RICHMOND, VA – Commissioner C. Ray Davenport announced today that Luminant Hopewell Power Plant in Hopewell, Virginia, has been approved as a Virginia STAR Worksite under Virginia's Occupational Safety and Health (VOSH) Voluntary Protection Programs (VPP), the program's highest level of recognition. The facility was honored with their first Certificate of Recognition issued on April 22, 2020.

"Luminant Hopewell Power Plant's employees and management at this facility have demonstrated a genuine desire to be a national leader in the area of occupational safety and health, and I commend them for implementing the elements and spirit of VPP," said Commissioner Davenport. "I congratulate Luminant Hopewell Power Plant on their achievement of this hard earned and well-deserved certification as a Virginia STAR Worksite."

Luminant Hopewell Power Plant's commitment to providing a safe and healthy workplace for its employees is demonstrated by its very low injury and illness rates. The Luminant Hopewell Power Plant has a total three-year average for the TCIR (Total Case Incident Rate for injuries and illnesses) of 0.0 compared with a 2018 Bureau of Labor Statistics (BLS) national rate of 1.5 for this industry, representing a TCIR rate 100% lower than the national average for the industry. The site's three-year average DART rate (Days Away, Restricted, or Transferred injury and illness cases) is 0.0 compared with the 0.7 national rate, which is 100% below the national average for the industry.

As part of the recognition for achieving Virginia STAR status under VPP, the worksite is entitled to fly the Virginia STAR Worksite flag. The Luminant Hopewell Power Plant is the only Luminant Virginia STAR site in Virginia. There are currently twelve Vistra Energy – the parent company of Luminant - VPP STAR sites in the United States. VPP includes two levels of participation, STAR and Merit, with STAR being the highest. Similar voluntary protection programs are conducted in other states across the country.

The process for reaching STAR status is extensive to ensure that only the very best programs qualify. Since the inception of Virginia's VPP in 1996, only 71 STAR worksites have been recognized, and only 35 Virginia companies currently retain the STAR designation. The Luminant Hopewell Power Plant has set a standard of excellence that is second to none.

In Virginia VPP, a cooperative relationship is formed between the VOSH program, the employer, and employees which include the agreement of company leaders to operate exceptional safety and health management systems that meet a rigorous set of occupational safety and health criteria. Employers agree to voluntarily participate in the program and to directly involve employees in all aspects of the company's safety and health management systems. Requirements include an extensive application process, submission of written safety and health policies and procedures, demonstration of successful implementation of those programs through injury and illness rates that are below the national average for the employer's industry, and an intensive weeklong inspection by a team of VPP experts.

Businesses that participate in VPP substantially improve safety and health protection for thousands of Virginia employees through cooperative efforts to reduce injuries, illnesses, and fatal accidents. Virginia STAR sites regularly report decreased bottom line costs associated with dramatically reduced injury and illness rates (an average of over 60% below the respective industry average), improved productivity, and increased employee morale. Reducing private sector employer costs associated with injuries, illnesses, and fatal accidents enhances a company's economic viability and competitiveness, and increases available capital for reinvestment, expansion, and new hiring.

The Virginia Department of Labor and Industry offers two voluntary protection recognition programs, the [Virginia Voluntary Protection Programs](#) (VPP) generally for larger employers and

the [Safety and Health Achievement Recognition Program](#) (SHARP) for businesses of 250 employees or fewer. Additional information can be obtained by contacting the Virginia Department of Labor and Industry office closest to you at www.doli.virginia.gov/ or for VPP, contact Milford Stern, VPP Manager at (540) 562-3580, ext. 123, or Milford.Stern@doli.virginia.gov; and for SHARP, contact Tracy Fitzpatrick, Consultation Program Manager at (804) 786-8707, or Tracy.Fitzpatrick@doli.virginia.gov.

The Virginia Department of Labor and Industry also offers [On-Site Consultation Services](#) to help employers better understand and voluntarily comply with VOSH standards. Priority is given to high hazard workplaces with 250 or fewer employees and all services are offered to employers at no cost. On-Site Consultation Services helps employers identify and correct potential safety and health hazards through walk-through surveys (without citations or penalties), provide abatement advice, provide on-site training, and provide program assistance to develop safety and health programs. Additional information about On-Site Consultation Services can be obtained by contacting the Virginia Department of Labor and Industry office closest to you at www.doli.virginia.gov or by contacting Tracy Fitzpatrick, Consultation Program Manager, at (804) 786-8707, or Tracy.Fitzpatrick@doli.virginia.gov.

The Virginia Occupational Safety and Health (VOSH) program is financed with 50% state funds and 50% federal funds in the form of a grant from the U. S. Department of Labor Occupational Safety and Health Administration (OSHA), under §23(g) of the Occupational Safety and Health Act of 1970. The Virginia State Plan, at the time of initial publication of this document on April 2, 2020, is funded by a grant of \$3,921,300 federal funds, which constitutes 48% of the State Plan budget. Zero percent, or \$0.00 of the State Plan budget, is financed through non-governmental sources.
